Tecidos indicados:

- Blackout – Tecido Pinpoint BK 1,83m (Col 063) / Tecido Dakota BK (Col 110)
- Tela Solar – Screen Fit (Col 255)

Indicam-se os tecidos acima por se tratarem de materiais leves, com excelente estabilidade dimensional e performance comprovada sob forte insolação.

Dimensões Máximas:

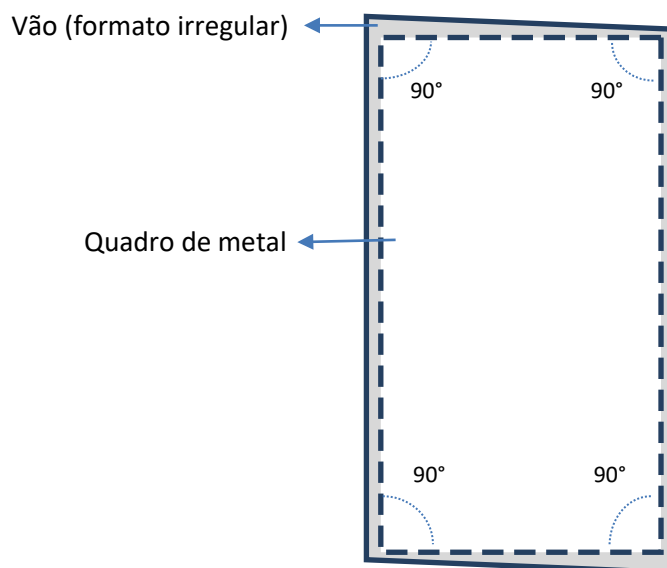

Dimensão	Máximo	Observação
Largura	1,20m	Larguras maiores podem fazer com que o tecido forme uma “barriga” ao centro, escapando do guia lateral
Comprimento	3,00m	Limite suportado pela mola para o correto tensionamento do tecido
Área	3,00m ²	

Utilização do Vareteiro:

O vareteiro preso nas guias laterais tem a função de evitar o abaulamento do tecido. Recomenda-se a sua utilização a cada 40cm ~ 50cm.

Instalação:

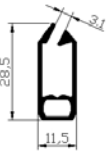

Recomenda-se fortemente que a Rolô Skylight NUNCA seja instalada diretamente no vão. Uma vez que o sistema exige uma angulação perfeita de 90° entre o Box e a guia lateral, deve-se instalar dentro do vão, primeiramente, um quadro de metal. Em seguida, dentro deste quadro, instala-se a Rolô Skylight.
